Abstract
How much "fake news" -- ersatz content from seemingly legitimate publishers -- was shared in 2016 and 2020, and by whom? This talk will walk through the tricky methodological challenges in counting suspect content, evaluate the patterns of sharing fake news, and discuss the implications for potential interventions to control exposure to misinformation.

Biography
David Lazer is University Distinguished Professor of Political Science and Computer Sciences, Northeastern University, and Fellow of the U.S. National Academy of Public Administration. His scholarship focuses on computational social science and social networks, with a particular focus on misinformation and political communication. His research has been published in such journals as Science and Nature, and has received widespread media attention, ranging from the New York Times to NPR.
