Dr. Matt Ryan is Associate Professor in Governance and Public Policy at the University of Southampton. He is Co-Director of the Centre for Democratic Futures, Policy Director at the Web Science Institute, and a Turing Fellow. His research focuses on democratic innovation, participation in policymaking, and improving social research methods.

Dr. Rafael Mestre is a Research Fellow at the University of Southampton. He has a multi-disciplinary background in physics, bioengineering, nanoscience and biorobotics, and uses computational techniques to solve interdisciplinary problems. His research is situated at the interface of political science and computer science, particularly in democratic innovations, argumentation, and natural language processing.
